HYBRID CLOUD AI FRAMEWORK

Orchestrating the Future
of Enterprise AI

TRANSFORMATIVE SERVICES

For more than two decades, GlobeOSS has partnered with telcos and enterprises to deliver mission-critical, data-centric platforms and services. Our early work centered on high-data volume, compliance-driven environments where reliability and governance were non-negotiable. These engagements allowed us to develop deep expertise in data orchestration, multi-cloud integration, and large-scale service management.

Today, we are leveraging that proven foundation to support clients on their data and AI transformation journeys. The GHCAI Transformation Services Portfolio brings together this heritage of trusted delivery with new capabilities in AI and hybrid cloud, providing organizations with a clear, modular path — from assessment, to building and scaling, through to long-term managed operations.

ACCESS

Technology & Data Readiness

Scope Comprehensive technology + data readiness assessment, covering infra, skills, data quality, governance, compliance, and roadmap	Outcome Clear adoption strategy and prioritized roadmap for data and AI transformation	Who Should Consider Enterprises exploring AI adoption, leadership teams needing a structured data foundation	Duration & Cost 6 - 10 weeks & RM 200K - RM 400K
---	--	--	--

BUILD

AI Farm - Pilot & Deployment

Scope Deployment of pre-built and custom data + AI applications, pilots, reusable frameworks, and integration with enterprise data	Outcome Fast ROI and proof-of-value from proven use cases, leveraging telco-grade data handling	Who Should Consider Organizations wanting quick wins and data-driven pilots	Duration & Cost 8 - 12 weeks & RM 400K - RM 800K
--	---	---	--

SCALE

Enterprise Expansion

Scope Enterprise-wide AI & data expansion with multi-cloud orchestration, governance, interoperability. Can include optional Interim AI Operator Services for monitoring, governance, and guardrails before transitioning into full GHCAI Orchestrated Managed Services	Outcome Enterprise-grade AI deployment built on secure, telco-grade data practices, with flexibility to add managed services as needed	Who Should Consider Mid-to-large enterprises scaling AI while ensuring trusted data	Duration & Cost Custom – multi-quarter programs, tailored to enterprise requirements
---	--	---	--

GHCAI AI OPERATOR SERVICES

Scope 5-layer framework (AI Farm, Multi-Model, Orchestration, Data, Foundation); full lifecycle monitoring, compliance, and optimization	Outcome Enterprise-grade AI deployment built on secure, telco-grade data practices, with flexibility to add managed services as needed	Who Should Consider Mid-to-large enterprises scaling AI while ensuring trusted data	Duration & Cost Custom – multi-quarter programs, tailored to enterprise requirements
--	--	---	--

GHCAI AI OPERATOR SERVICES

The Hybrid Cloud, AI Orchestrator and Managed Services Partner

Full AI Operator Services

- End-to-end orchestration of data, AI, and hybrid cloud
- Enterprise-wide adoption with industry use cases
- Continuous innovation through AI ecosystems (NVIDIA, Intel, AMD, and global vendors).
- Sustainable, outcomes-driven transformation with measurable ROI

Core AI Operator Services

- Multi-cloud integration (AWS, Azure, Google, IBM, HPE, Huawei, Alibaba)
- Multi-model AI/ML deployments with governance
- Ongoing monitoring, optimisation, and cost control
- Security, compliance, and data sovereignty built-in

Interim AI Operator Services

- Quick-start, low-risk engagements
- Targeted AI/Analytics use cases (eg. customer analytics, automation)
- Immediate business value demonstration

ORCHESTRATED OUTCOMES

From Foundation entry points to full-scale enterprise transformation, GlobeOSS provides a modular path that respects each customer's maturity, giving them choice, flexibility, and confidence to scale responsibly and securely.

FULL ENTERPRISE TRANSFORMATION SERVICES

Lead Industry at Scale

Scope

Orchestrate data, AI, and hybrid cloud across the enterprise with full lifecycle management, compliance, and industry use cases.

Outcome

Sustainable transformation, measurable ROI, and competitive advantage with freedom of choice across ecosystems.

CORE GROWTH SERVICES

Scale with Confidence

Scope

Expand pilots into enterprise deployments through multi-cloud integration (AWS, Azure, Google, IBM, HPE, Huawei, Alibaba), multi-model AI/ML, and strong governance. Builds directly on the foundation stage.

Outcome

Responsible scaling with flexibility, compliance, and cost efficiency, preparing the way for enterprise transformation.

FOUNDATION SERVICES

Start Small, Prove Value

Scope

Low-risk engagements such as analytics or automation pilots that validate value, assess readiness, and deliver quick wins. Serves as the launchpad for growth.

Outcome

Fast ROI and confidence-building results that enable smooth progression into the growth stage.
