# AI OPERATOR SERVICES

GlobeOSS AI Operator Services unifies data, AI, and cloud into a trusted foundation for digital transformation. For more than two decades, GlobeOSS has partnered with local and global hyperscalars to deliver mission-critical, data-centric platforms and services in high-volume, compliance-driven environments where reliability and governance are non-negotiable. These engagements built deep expertise in data & AI orchestration, multi-cloud integration, and large-scale service management.

## Discover our tested GlobeOSS AI Operator Services:

### TRUSTED AI OUTCOMES

Faster Decisions  
Cost Efficiency

Compliance & Trust  
Scalability & Resilience

### INDUSTRIES WE SERVE

FSI

Telco

Healthcare

Retail

Government

Manufacturing

### AI FARM

(Pre-built AI & ML apps)

### MULTI-MODEL AI & ML EXPERIENCE

NLP - Predictive, Gen AI,  
Data Mgmt, Recommenders

### ORCHESTRATION

#### GLOBEOSS AI ORCHESTRATION FRAMEWORK

APIs, Governance, Monitoring, Interoperability

### PLATFORM

#### DATA CONSOLIDATION & GOVERNANCE

Multi-Cloud & Hybrid Migration

### FOUNDATION

#### GLOBEOSS AI OPERATOR SERVICES DECK

Runtime, Guardrails, Workflow, Infra Optional

# GLOBEOSS AI OPERATOR SERVICES COMPONENTS

GlobeOSS AI Operator Services enable enterprises to adopt AI and hybrid cloud at their own pace, supported by GlobeOSS's multi-cloud partnerships, telco-grade reliability, and decades of expertise, turning experiments into structured, measurable outcomes.

## AI Farm (Proven AI & ML Applications)

Productized apps from client success stories, delivering rapid ROI and accelerated outcomes.

Ready-to-deploy industry solutions that accelerate business outcomes. Applications are productized from real-world client projects, ensuring proven value and rapid ROI.

## Multi-Model AI & ML (Breadth of AI Expertise)

Expertise across NLP, computer vision, predictive analytics, generative AI, and data management.

Expertise in NLP, Computer Vision, Predictive Analytics, Generative AI, and Data Management. GlobeOSS enables cross-industry AI adoption with enterprise-grade trust, resilience, and scalability.

## Orchestration Framework (Simplifying Complex AI)

Governed orchestration layer with APIs, monitoring, and interoperability built on telco-grade reliability.

Robust orchestration layer with APIs, governance, monitoring, and interoperability, simplifying the deployment and management of complex AI ecosystems. Built upon GlobeOSS's proven telco-grade orchestration experience.

## Unified & Governed Data Platform

Consolidates hybrid and multi-cloud data into a trusted single source of truth, ensuring privacy and compliance.

Multi-cloud and hybrid migration services with governance, privacy, and compliance at the core. Consolidates data into a single source of truth for secure and trusted insights.

## Foundation (Resilient Managed Backbone)

Operational guardrails, monitoring, workflows, and infrastructure support ensuring resilient performance.

The operational backbone providing runtime, guardrails, workflow, and optional infrastructure management. Offers holistic monitoring, proactive optimization, and support across environments.

# Why Consider AI operator Services for Your AI Growth?

Building and scaling AI in-house is complex, resource-intensive, and often fragmented. Common challenges include:

- Islands of AI projects that don't scale beyond pilot stage.
- Shortage of multi-cloud and multi-model AI expertise.
- High costs to recruit and maintain specialized teams.
- Compliance and governance risks around data and AI usage.
- Siloed data that prevents unified insights and slows decision-making.
- Inconsistent digital experiences for employees and customers.

Lifecycle support bridges these gaps by providing ready expertise, pre-built frameworks, and governed operations, helping organizations accelerate AI adoption while staying secure, compliant, and cost-efficient. With GHCAI lifecycle services, enterprises gain a trusted partner who simplifies complexity, manages the full lifecycle, and ensures AI becomes a driver of growth, not an experiment stuck in silos.

## GlobeOSS Experience – Transforming AI into Success

- Decades of Telco-Grade Expertise – Over 20 years of delivering mission-critical, data-centric services with enterprise reliability and governance.
- Proven Multi-Model AI & ML Use Cases – From fraud detection in financial services to predictive maintenance in utilities, delivering real-world outcomes.
- Seamless Multi-Cloud Integration – Deep partnerships with AWS, Microsoft Azure, Google Cloud, IBM Cloud, HPE GreenLake, Huawei Cloud, and Alibaba Cloud.
- Enterprise-Grade Security & Governance – Compliance, data sovereignty, and trusted interoperability built into every engagement.
- Low-Risk, High-Value Entry Points – Start with Interim AI Operator Services to unlock immediate value while building a scalable foundation.
- Trusted Global Ecosystem – Partnerships with leading technology providers including NVIDIA, Intel, AMD, and global vendors.
- Sustainable Business Impact – Moving clients beyond trials into measurable, outcomes-driven transformation.
